Finnish	English	Swedish
Native	Professional	Basics

Summary

Software developer with 4+ years of experience building cloud-based distributed systems and full-stack applications. Experienced with TypeScript, React, AWS, and service-oriented architectures. Passionate about cloud systems, clean and reliable code, and building software that creates real impact for users. I am also very interested in AI based development, tools, and solutions.

Education

University of Jyväskylä	M.Sc
Computer Science	Jyväskylä • 2022 - 2024

- Thesis: Error monitoring in cloud-based distributed systems

University of Twente	Enschede, The Netherlands • Feb 2023 - Jun 2023
Computer Science	

- Erasmus exchange semester in the Netherlands

University of Jyväskylä	B.Sc
Computer Science	Jyväskylä • 2019 - 2022

- Thesis: Smart assistants' usage in smart homes
- Minor: Mathematics

Experience

Akamon Innovations	Jyväskylä
Software Developer -> Lead Developer	2021 - Present

Tech: TypeScript, C#/.NET, React, React Native, Node.js, GraphQL, AWS, CDK, REST

Lead Developer Jan 2026 - Present

Promoted to Lead Developer, leading a team of 5 engineers.

- Responsible for feature and system architecture design
- Facilitating daily standups and sprint planning
- Mentor developers and drive code quality through review

Software Developer Jan 2022 - Jan 2026

Started as a part-time Junior Software developer alongside my studies.

Promoted to mid-level software developer after my graduation in June 2024.

- Built full-stack features across React, GraphQL APIs, and AWS — including a reusable UI component library and event-driven distributed services
- Designed and implemented a distributed error monitoring system for cloud microservices using AWS CDK
- Owned end-to-end delivery of an electricity contract ordering workflow, from UI through APIs to external integrations
- Maintained CI/CD pipelines using GitHub Actions and AWS CodePipeline

Software Developer Trainee Jun 2021 - Sep 2021

Software developer trainee position to start my IT career.

- Building and training an AI chatbot using Wit.ai for intent processing.
- Full-stack development for chatbot conversation handling and customer service UI.
